Insight and Recommendations

Data Analysis Project – Nusantara Car Motor

1. Yearly Revenue and Growth

Insight:
Cumulative completed revenue from 2021 through September 2026 reached Rp 5.61 trillion. Following a post-pandemic market rebound in 2022 (+64.98% YoY),

year	Total Revenue	Revenue difference from Previous
2021	Rp453,908,200,000	
2022	Rp748,848,100,000	Rp453,908,200,000
2023	Rp1,000,446,700,000	Rp748,848,100,000
2024	Rp1,224,637,400,000	Rp1,000,446,700,000
2025	Rp1,278,679,500,000	Rp1,224,637,400,000
Total	**Rp4,706,519,900,000**	**Rp3,427,840,400,000**

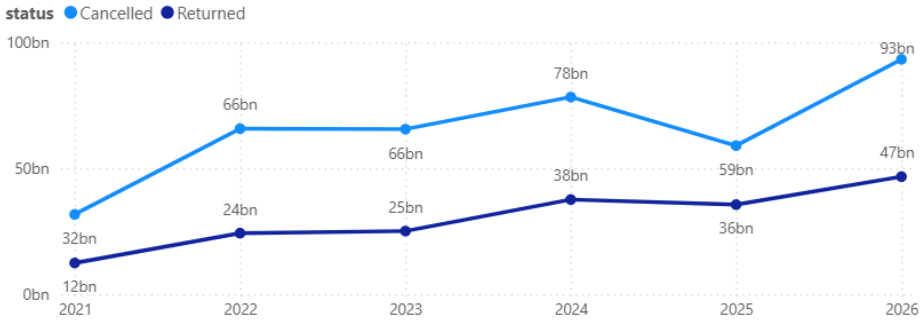

yearly revenue growth decelerated significantly, dropping to +33.6% in 2023, continue to +22.41% in 2024, and slowing down to +4.41% in 2025.

Action Recommendation:

Because YoY growth has slowed down without interruption since 2022, management must treat this as a structural maturity phase rather than a temporary market dip. Company need figure

2. Failed and returned transactions

Insight:
From analysis we find that status transaction from 2021 – 2026 only take ±10% from all revenue. Rates are increase (cancel 5.6% to 6.7%, return 2.4% to 2.8% per year).

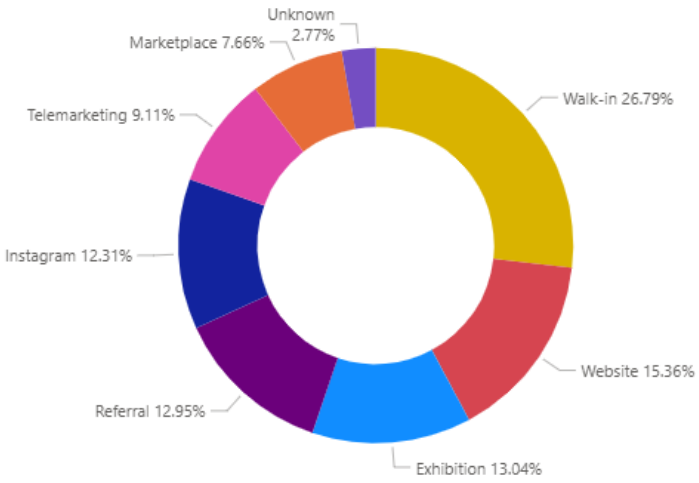

From the trend line, across 2021 – 2026, transactional leakage remained consistent. Cancelation stable at 5 – 7% and return stable in 2 – 3%. For this findings we assume that the effort from company team to decrease this trend still not workable. Marketing & Sales department need to implement aggressive and direct approach to decrease this trend.

Action Recommendation:

The variation of root cause still need to figure out deep detail, but from this state, company need to gather information about customer behaviour especially for every customer that want to return or cancel sales transaction. For example, every return or cancellation, sales teams or customer service need to ask information from customer and figure out why customer want to cancel or do return and if we give another option, will customer change their mind? The other side, company need to track quality control and delivery tracking. Is there any bottleneck from backend, for instance from product and operational system

3. Percentage of leads-source channels distribution

Insight:
Acquisition channels are heavily led by Walk-ins (26.79%), followed by Website (15.36%), Exhibition (13.04%), and Referrals (12.95%). Walk-ins prove that physical showroom visibility and foot traffic drive a high volume of casual browsing and conversions, strongly supported by digital presence (Website and Maps) and physical auto shows.

Action Recommendation:

Maximize foot-traffic potential by placing scalable billboards and outdoor advertisements near high-performing dealerships. Simultaneously, optimize local SEO, Google Maps visibility, and Search Engine Marketing (SEM) while committing to high-yield exhibition events.

4. Average Year on Year monthly growth

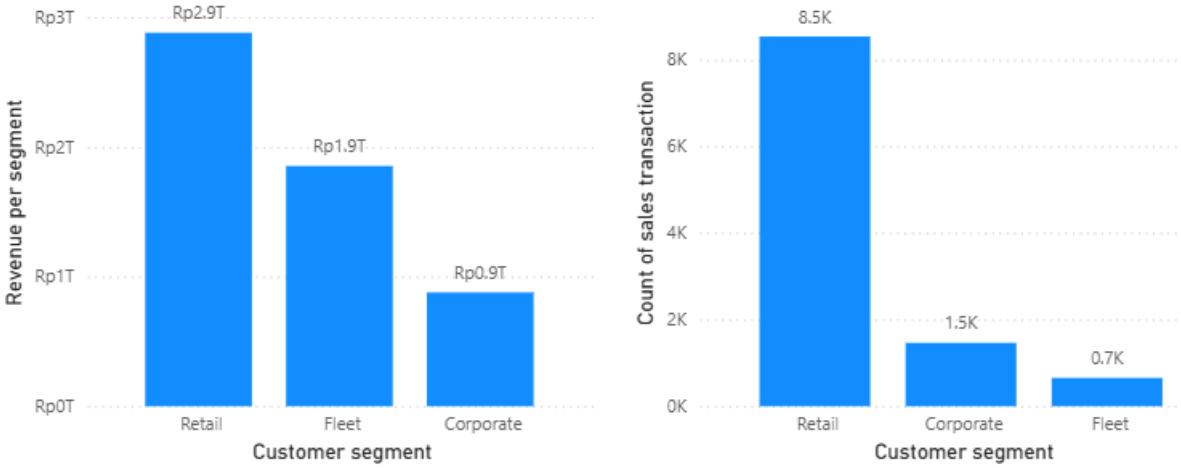

Insight:
Monthly revenue exhibits a strong seasonal pattern. August, September, and December consistently outperform the yearly average, while February acts as the universal slow period. For example, September averages Rp 109 billion compared to February's Rp 71 billion (making September roughly 53% higher than February).

Action Recommendation:

Plan sales targets, stock and marketing around the calendar instead of a flat monthly average. Build up vehicle inventory and staffing levels ahead of the peak months (August, September, December), while launching targeted promotional campaigns and incentives during slow months (February and June) to bridge the revenue gap.

5. Customer Segment contribution to Sales transactions and Company Revenue

Insight:
While Retail generates the majority of our transactions and overall revenue, a correlation analysis reveals a striking contrast in the Fleet segment. Although Fleet accounts for fewer than 1,000 transactions, it drives nearly 33% of the company's total revenue. Consequently, the Fleet segment is our most efficient revenue driver, achieving high returns on a low transaction volume.

Action Recommendation:

Implement differentiated management strategies across segments. Protect and service the high-value Fleet and Corporate accounts with dedicated key-account managers, while developing a structured retail acquisition and retention program to revive stalling retail growth.

6. Top 5 revenue contribution from Customer by each Customer Segment

Insight:
This analysis will split for each segment.
Fleet: PT Cahaya Teknik Indonesia (IDR 33.1 bn), PT Maju Sentosa Utama (32.5 bn), PT Berkah Konstruksi Persada (30.5 bn), PT Global Agro Sejahtera (29.7 bn) and PT Bintang Energi Indonesia (27.1 bn). Each bought 49 to 84 cars over 5 to 8 orders, and together they hold 8.2% of Fleet revenue.

Corporate: CV Abadi Energi Indonesia (5.8 bn), PT Abadi Distribusi Utama (5.3 bn), PT Sejahtera Energi Indonesia (5.2 bn), CV Graha Utama Persada (5.1 bn) and PT Karya Persada Nusantara (5.0 bn), 3.0% of corporate revenue.

Retail: the top five spent IDR 1.7 bn to 2.5 bn each (0.3% of Retail revenue), and all five bought a Toyota Alphard. Inside each segment the top 10% of customers hold only 22% to 28% of the segment's revenue, so there is no dependency on a few key accounts.

Segmen Customer	Full Name	Rank segment
Corporate	CV Abadi Energi Indonesia	1
Fleet	PT Cahaya Teknik Indonesia	1
Retail	Bagus Chandra Halim	1
Corporate	PT Abadi Distribusi Utama	2
Fleet	PT Maju Sentosa Utama	2
Retail	Rizky Suryadi	2
Corporate	PT Sejahtera Energi Indonesia	3
Fleet	PT Berkah Konstruksi Persada	3
Retail	Joko Dharma	3
Corporate	CV Graha Utama Persada	4
Fleet	PT Global Agro Sejahtera	4
Retail	Eka Pane	4
Corporate	PT Karya Persada Nusantara	5
Fleet	PT Bintang Energi Indonesia	5
Retail	Adit Wijaya	5

Action Recommendation:

To sustain this momentum, the company must build and maintain strong relationships with these key customers. Management can establish a dedicated relationship team by assigning a designated account executive to each high-revenue customer.

Additionally, the company should introduce a rewarding loyalty program with strong benefits and referral incentives. This program can also serve as an acquisition tool, encouraging other prospective buyers to purchase vehicles and join the program.

7. Top 3 & Least 3 Customer city(domicile) for contribution revenue

Insight:
This analysis will spot top 3 customer city domicile that generate contributed revenue and least 3 customer city.

city	Rank	Total Revenue
Jakarta Selatan	1	Rp382,188,800,000
Surabaya	2	Rp373,366,700,000
Jakarta Timur	3	Rp357,380,300,000
Serang	34	Rp39,611,200,000
Kupang	35	Rp27,450,000,000
Mataram	36	Rp21,731,100,000

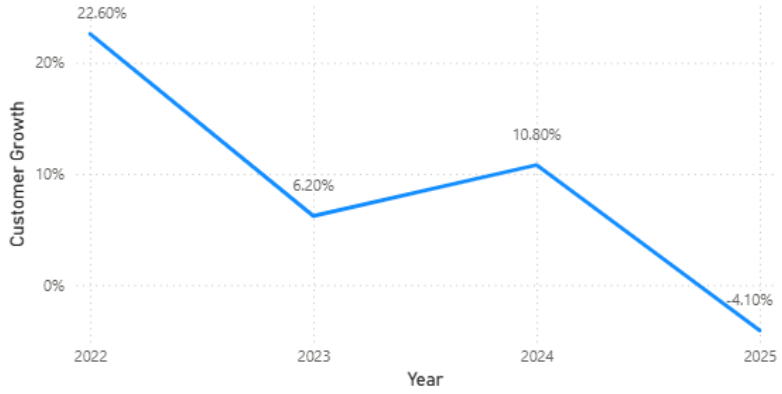

From the table we can see South Jakarta, Surabaya, and East Jakarta generated most revenue. Also, the least 3 city from Serang, Kupang, and Mataram.

Action Recommendation:

Use top cities as market benchmark for well served from dealers. For weakest cities, company need check the root cause of this result. It could be because small customer base, market awareness, or internal dealers performance or no representative dealers for each least city that generate least revenue.

8. Customer Registration growth each Year

Insight:
From trendline below, we see the growth decreasing from 2022 – 2025. But there's small increasing growth from 2023 to 2024. Then, the growth has been turned to negative value in 2025.

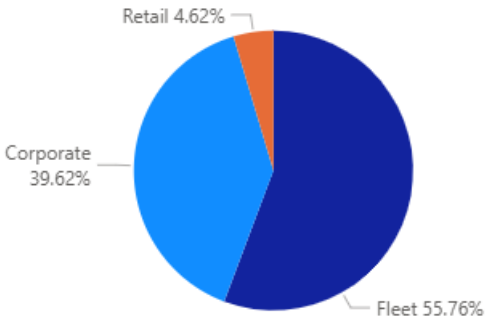

Action Recommendation:

Analyse customer acquisition funnels to pinpoint where prospective buyers drop off after initial awareness. Execute retargeting campaigns aimed at lookalike profiles of repeat buyers to rebuild the top-of-funnel customer acquisition rate.

9. Percentage of repeat sales transactions from each customer

Insight:
Repeat customers shares strong values between Corporate and Fleet segment. Otherwise for Retail only small percentage do repeat transactions. Also in detail, this table represent who top customers that usually purchase from dealers. If we correlate with table Top 5 revenue contribution from Customer insight no 6, customer for 'Bagus Chandra Halim' generate most revenue from retail and also keep purchasing car.

Segment	Customer Name	Rank
Corporate	PT Karya Persada Nusantara	1
Fleet	PT Bintang Energi Indonesia	1
Retail	Bagus Chandra Halim	1
Corporate	PT Sejahtera Transindo Indonesia	2
Fleet	PT Karya Agro Sejahtera	2
Retail	Rahma Nasution	2
Corporate	PT Abadi Trans Indonesia	3
Fleet	PT Maju Sentosa Utama	3
Retail	Daniel Purnomo	3
Corporate	PT Bintang Pangan Utama	4
Fleet	PT Global Agro Sejahtera	4
Retail	Eko Kurniawan Kusuma	4
Corporate	CV Cahaya Sentosa Sejahtera	5
Fleet	PT Karya Konstruksi Sejahtera	5
Retail	Teguh Handayani	5

Action Recommendation:

For retail, company need to do customer profile analysis to identify customer like ‘Bagus Chandra Halim’. For example, company can analyse behaviour, favourite car specification and deep analysis about this customer profile. Then company can engage marketing to similar customer profile like ‘Bagus Chandra Halim’.

Company can build a Retail retention programme, for example service reminders, upgrade and trade-in offers, and a referral reward after the first purchase, because 93% of Retail customers buy only once and even a small rise in the repeat rate matters for a base of 7,937 customers.

For Corporate and Fleet segment, company can do research from companies that repeat purchasing to answer why they keep purchase vehicles, how often and when the moments they do purchasing? From that research, we can set approach. For example, company from list of table purchasing car at end of year, when their employees achieve targets of year. So, on that moments, we can set specific discount for that company. At other side company can apply other approach to get more sales from existing customers.

10. Distribution of Payment Method usage by each segment

Insight:
The payment mix depends on the segment, not on customer demographics.
Retail pays by Leasing 46.4%, Cash 27.8% and Bank Credit 25.8%;
Corporate by Cash 54.4%, Bank Credit 30.2% and Leasing 15.4%;
Fleet by Cash 43.4%, Leasing 31.9% and Bank Credit 24.7%.

Inside Retail the mix is the same for every age band and occupation (leasing 42% to 49%). Margin is similar by method (cash 9.9%, leasing 10.7%, bank credit 10.5%), and the 11 financing partners each hold 7% to 10% of financed revenue.

Action Recommendation:

Tailor promotions to preferred payment methods. Partner closely with top leasing firms to co-market low-interest retail financing packages, while offering cash-discount incentives or complimentary maintenance packages to corporate buyers.

11. Growth comparison of first sales transactions by each customer against repeat sales transactions by each

Insight:

From the analysis that we can look from table, Revenue from first transaction(3 trillion) larger than revenue from repeat transaction(1,5 trillion). But if we look for growth percentage between First new Revenue against Repeat Revenue, we can see figure from average percentage(**in bold number**) growth for Repeat much larger than first transaction revenue about **158,65%**. This meaning, there are more potential revenue for company can achieve from existing customers.

year	Revenue Repeat Transaction	YOY Growth Repeat Transaction	YOY First Transaction	Revenue First Transaction
2021	25626400000			428281800000
2022	144128600000	46.24	41.20	604719500000
2023	362256800000	15.13	5.50	638189900000
2024	474602900000	31.00	17.50	750034500000
2025	559032400000	17.80	-4.10	719647100000

Action Recommendation:

Prioritize customer relationship management and database classification. Build distinct marketing workflows to nurture existing single-purchase retail customers into repeat buyers, lowering overall customer acquisition costs (CAC).

12. Top and Least dealers contribution for Company Revenue

Insight:
The top 5 revenue-generating dealers are all located in Jabodetabek (led by Bekasi Summarecon at Rp 304.5B and Cawang at Rp 293.2B), accounting for 25.3% of total revenue. Excluding new 2025/2026 branch launches (Batam, Padang, Manado), the lowest-performing established dealers are Medan Katamso, Pontianak – Ahmad Yani, and Balikpapan – MT Haryono.

Dealer Name	Total Revenue	Dealer Ranks	Year
Nusantara Motor Bekasi - Summarecon	Rp304,514,700,000	1	2015
Nusantara Motor Jakarta Timur - Cawang	Rp293,217,400,000	2	2015
Nusantara Motor Jakarta Selatan - Fatmawati	Rp288,147,100,000	3	2017
Nusantara Motor Balikpapan - MT Haryono	Rp116,377,800,000	26	2012
Nusantara Motor Medan - Katamso	Rp110,364,100,000	27	2011
Nusantara Motor Pontianak - Ahmad Yani	Rp69,245,300,000	28	2017
Nusantara Motor Batam - Nagoya	Rp32,036,300,000	29	2025
Nusantara Motor Padang - Khatib Sulaiman	Rp23,578,900,000	30	2025
Nusantara Motor Manado - Sam Ratulangi	Rp6,774,300,000	31	2026

Action Recommendation:

Establish reward and recognition programs for top-performing Jabodetabek dealers and document their best practices as operational benchmarks. For underperforming regional branches, implement mandatory performance monitoring, sales coaching, and corrective action plans.

13. Potential customer city(domicile) markets where not yet have dealer presence

Insight:

Eight customer cities have no dealer but still produced 669 completed sales and IDR 326 bn (5.8% of revenue). Here are those cities: Cirebon, Samarinda, Serang and Jambi; Sukabumi, Kendari, Kupang and Mataram. These customers already buy through a default dealer, for example Kupang and Mataram in Denpasar, Kendari in Makassar, Samarinda in Balikpapan and Jambi in Medan. Demand per city is modest (IDR 4 bn to 15 bn in 2025) against IDR 16 bn to 18 bn for the smallest long-established dealers.

Action Recommendation:

Prioritize these 8 high-demand cities for physical expansion. Before investing in full brick-and-mortar showrooms, deploy low-cost satellite sales booths or pop-up displays supported by regional logistics hubs to capture local market share.

14. Dealer sales target vehicle units Evaluation

Insight:
Evaluating performance from September 2025 to August 2026 reveals widespread target shortfalls: each dealer missed their monthly unit sales target at least once, & **half of the dealer network (14 branches) missed their targets for 9 to 12 months** out of the year.

dealer_name	Monthly target units	Non achieve target months
Nusantara Motor Surabaya - Darmo	20	12
Nusantara Motor Medan - Gatot Subroto	17	11
Nusantara Motor Medan - Katamso	10	11
Nusantara Motor Palembang - Sudirman	11	11
Nusantara Motor Jakarta Selatan - Fatmawati	27	10
Nusantara Motor Jakarta Selatan - TB Simatupang	23	10
Nusantara Motor Tangerang Selatan - BSD City	21	10
Nusantara Motor Bandung - Pasteur	15	9
Nusantara Motor Bogor - Baranangsiang	11	9
Nusantara Motor Denpasar - Sunset Road	12	9
Nusantara Motor Makassar - Urip Sumoharjo	14	9
Nusantara Motor Padang - Khatib Sulaiman	6	9
Nusantara Motor Pontianak - Ahmad Yani	7	9
Nusantara Motor Surabaya - Rungkut	17	9

Action Recommendation:

Review every target for each dealers. Company can take the highest sales units that possible or already achieve by those dealers. For example, if Nusantara Motor Surabaya – Darmo ever get 15 sales units in one month as highest sales units. Then company can set close to 15 sales unit. Then give training and support for sales teams on those dealers, and monitoring performance per week is good approach that company can do.

15. Comparison numbers of sales transactions and numbers of dealers for each region

Insight:
Jabodetabek dominates with 11 dealers averaging Rp 250 billion in revenue per dealer. Conversely, regions like Sumatera (7 dealers, averaging Rp 100B per dealer) and Kalimantan show high dealer counts relative to low output efficiency, while Bali & Nusa Tenggara shows strong per-dealer efficiency from a single location (Rp 158B).

region	count dealers	count sales transactions	revenue for region	average revenue per dealer
Bali & Nusa Tenggara	1	357	158	158
Jabodetabek	11	5119	2752	250
Jawa	8	2639	1417	177
Kalimantan	3	586	344	115
Sulawesi	2	491	239	120
Sumatera	7	1463	702	100

Action Recommendation:

Optimize resource allocation by expanding physical footprint in high-efficiency regions like Bali & Nusa Tenggara. For low-yield regions like Sumatera, audit branch operational bottlenecks and enforce stricter performance accountability.

16. Top 3 and Least 3 Vehicle model that contribute for Company Revenue

Insight:
Revenue is heavily anchored by the Toyota Innova Zenix (Rp 508B, 1,043 units), Toyota Avanza (Rp 479B, 1,867 units), and Mitsubishi Xpander (Rp 382B, 1,144 units). The lowest contributors are niche models like the Suzuki Jimny and electric vehicles like the Hyundai Ioniq 6 and Kona Electric.

brand	model	Revenue vehicles	Total sales quantity	Rank
Toyota	Innova Zenix	508179800000	1043	1
Toyota	Avanza	479681600000	1867	2
Mitsubishi	Xpander	382299800000	1144	3
Suzuki	Jimny	18016800000	35	53
Hyundai	Ioniq 6	17847500000	18	54
Hyundai	Kona Electric	14755200000	22	55

Action Recommendation:

Protect supply chain stability for top-selling core models to prevent stockouts and lost revenue. Simultaneously, streamline inventory by cutting slow-moving vehicle trims and reallocating capital toward high-demand hybrid and electric categories.

17. Top brands car and company dependency for those brands

Insight:
Toyota brings 35.7% of revenue (2 trillion), Mitsubishi 15.7% and Honda 14.1%. Toyota rose from 23.4% in 2021 to a peak of 40.1% in 2023 and 35.3% in 2025. Other thing need to be highlighted is BYD entered in 2024 and reached 7.2% revenue in 2025 which is potential brand for further sales periods.

Action Recommendation:

Revenue depends heavily on Toyota, so protect that supply and relationship while building the next brands with growth potential, such as BYD. Set brand-level targets, and monitor the Toyota share as a concentration risk indicator.

18. Which 5 vehicle classification that give most contribution for Revenue each year

Insight:
This detail analysis will be split to each part of vehicle classification over year.
Seaters Specification: 7 seaters and 5 seaters give more than half portion sales.
Body type : MPV make 37.7% sales, follow by SUV 33.3% and hatchback 19,8 %
Transmission: CTV make more than half portion(54%), while manual only make 23%
Fuel type: EV rose from 0.5% to 10.6%, hybrid around from 10% then petrol still on top for around 80%.

Action Recommendation:

Align with detail specification, brand – model vehicle with 5 or 7 seaters + MPV or SUV + CVT transmission + Petrol fuel stock is ideal vehicles and likely by most of customers. So, we can offer and create promotion for this vehicle type specification

19. The most profitable vehicles model and compare to volume transactions

Insight:
Most profitable comes from Avanza (IDR 54 bn with 1,867 units), Innova Zenix (46 bn) and Xpander (39 bn). Margin percentage and volume are unrelated (correlation 0.09)

Action Recommendation:

Boost marketing campaign or promo for those model vehicles, and check for pricing and cost. Company need to figure out approach to cut product cost, so pricing will flexible and attract more customers for cheaper price.

20. Discount threshold breakdown

Insight:
Average net profit margin fall, while discount grows. For example, when average net profit margin decrease to 13%, discount rise up from 0 to 2%. By segment, Fleet averages a 6.5% discount for a 7.7% margin, Corporate 4.0% for 10.1% and Retail 1.5% for 12.1%.

Action Recommendation:

Create risk discount management plan to mitigate decreasing of net profit margin. Company can implement discount management system, whom need approval by sales marketing manager on dealer side, region manager, then specifically Chief Marketing and Sales approval for high percentage discount with tiny net profit margin. Then keep monitor discount and margin per segment every month.

Conclusion

Top priority recommendation:

Based on the comprehensive data analysis, Nusantara Car Motor has achieved remarkable cumulative scale (Rp 5.61 trillion), but faces clear post-pandemic maturation. To reshape organic growth, plug financial leaks, and optimize the operational footprint in alignment with project goals, management must immediately execute the following Top 3 Priority Recommendations:

1. Recommendation 1
   Rebalance customer Acquisition to Fleet B2B Accounts, instead just focus on Retail.
   Explanation:
   While retail contribute 8% volume transaction, growth still falling and repeat purchase are critically low at 4.62%. Sales management team must maintain and expand high value B2B Fleet and Corporate relationship by assign dedicated account management team then introduce plenty program like loyalty program, special event promotion to engage sales transaction from these segments.

2. Recommendation 2
   Risk Discount Management Plan
   Explanation:
   Create risk discount management plan to mitigate decreasing of net profit margin. Company can implement discount management system, whom need approval by sales marketing manager on dealer side, region manager, then specifically Chief Marketing and Sales approval for high percentage discount with tiny net profit margin. Then keep monitor discount and margin per segment every month.

   With discounts climb higher, net margins collapse—with several transactions dipping below cost. Without strict controls, frontline sales reps give away too much margin just to close individual deals and hit short-term unit targets.

3. Recommendation 3
   Reallocate Inventory for High Demand Brand – Model Vehicles to High Demand Regions and City
   Explanation:
   In order to strengthen dealer network, we can give them recommendation to sell high demand vehicles that usually eager to buy from customers. Also build new dealers at city that untapped like 8 high-demand cities for physical market expansion. These list of cities: Cirebon, Samarinda, Serang and Jambi; Sukabumi, Kendari, Kupang and Mataram could be real potential to gain revenue growth.

   Also, Management must reallocate stock to high-efficiency product mixes (7-seater MPVs/SUVs and Hybrids), penalize chronically underperforming dealers after fixing proper monthly target units, and establish new dealers in proven unserved city markets.
